

At Carelicity, patients are referred to us by healthcare professionals and organizations. Carelicity works collaboratively with physicians, hospitals, insurance providers, and case managers to ensure seamless coordination of care. We accept most insurance providers, helping patients maximize their coverage and benefits. We also offer private pay options for patients. Contact us today to learn more.

Our Vision

To become a leading home healthcare provider in the community, upholding unmatched standards of quality, safety, and excellence. Simplifying healthcare delivery for patients and families.

Our Mission

Providing services to patients in their homes and assisting them to achieve the highest level of potential in their day to day selfcare activities. We are committed to providing high quality, multidisciplinary care by professionals who recognize the need for a comprehensive assessment of needs from both the patient's and professional's point of view.

About Us

Welcome to Carelicity, your partner in compassionate and reliable home care services. With our personalized approach, we enhance the well-being and independence of every patient we serve. Our commitment to quality care ensures the highest standards of health, safety, and happiness for our patients. Here is what sets us apart:

Experienced and Compassionate

Caregivers: Our staff are well trained to provide exceptional care with empathy and dedication.

Personalized Care Plans: We tailor care plans to meet the unique needs of all our patients.

Continuity of Care: Our staff offer consistent support, build trusting relationships, and promote a sense of companionship.

Family Involvement and

Communication: Open communication with patients and their families is vital. We provide regular updates, address concerns, and value feedback to continually improve our services.

Our Services

Skilled Nursing

Medication Management: Assisting with medication administration, ensuring that the right medications are taken at the correct times and dosages. Monitoring and identifying potential adverse reactions or drug interactions.

Wound Care: Performing wound assessments, dressing changes, and managing various types of wounds, including surgical incisions, pressure ulcers, and diabetic wounds.

Chronic Disease Management: Helping patients manage chronic conditions such as diabetes and heart disease.

IV Therapy: Administering intravenous (IV) medications, fluids, and nutrition. Monitoring IV sites for complications. Providing education on self-care if a patient requires ongoing IV therapy at home.

Palliative Care and Symptom

Management: Providing specialized care for individuals with serious or terminal illnesses. Focusing on pain and symptom management.

Physical and Occupational Therapy

Gait/Mobility Training: Assistance in relearning proper walking techniques, using assistive devices, and enhancing mobility.

ADL Training: Focus on regaining skills for self-care activities like bathing, dressing, grooming, eating, and toileting.

Home Health Aides (HHA)

Personal Care Assistance: HHAs help with activities of daily living (ADLs) like bathing, grooming, dressing, and toileting, ensuring personal hygiene.

Monitoring and Reporting: HHAs observe and report changes in condition, behavior, or needs of the patient.

Companionship: HHAs provide companionship, engage in activities, and offer emotional support.
